Xi'an Jiaotong University

B.S. in Engineering; Second Major in Accounting

Xi'an, China

Aug 2014-June 2018

ACADEMIC EMPLOYMENT

Public Company Accounting Oversight Board (PCAOB)

Aug 2024-May 2025

Office of Economic and Risk Analysis (OERA), Visiting Research Intern

Note: *This invited employment supported the development of two active working papers.*

JOB MARKET PAPER

[1] Behind Closed Doors: Presidential Meetings and Strategic Public Disclosure

Abstract: The public cannot fully observe what the U.S. president is working on, and the President chooses what to communicate publicly. I examine what drives this strategic disclosure and its capital-market implications. From 1935 to 2009, I use the Presidential Daily Diaries to reconstruct the President's minute-by-minute schedule and the Presidential Public Papers to identify what the President communicates publicly. I use an LLM-assisted process to identify the potential policy topics discussed in each presidential meeting. I apply the same process to classify the policy topics in the President's public communications. I then compare the daily distribution of potential meeting topics with the daily distribution of topics in the President's public communications. I measure the similarity between these distributions using cosine similarity. The similarity is higher when meetings concern issues voters consider important and lower when meetings concern issues that divide either the President's own party or the two parties. When the President's meetings concern issues that divide the President's own party, the President communicates relatively less about those issues. When the meetings concern issues that divide the two parties, the President communicates relatively more about those issues. When presidential approval is low, the evidence is consistent with the President communicating relatively more about voter priorities and relatively less about issues that divide the President's own party. Meeting topics and public communications also become more similar as Election Day approaches when the incumbent seeks reelection and around funding deadlines that can produce a government shutdown. Greater similarity between presidential meeting topics and public communications is associated with lower subsequent market uncertainty at both the aggregate and firm levels. Together, these findings suggest that the President strategically conveys what he is working on and that these communications have capital-market implications.

WORKING PAPERS

[2] Market-based Incentives for Audit Quality

Status: Minor Revision at *Management Science*

with Andrew Acito, Amir Amel-Zadeh, James Anderson, William Anderson, Daniel Aobdia, Thomas Bourveau, Francois Brochet, Huaizhi Chen, Jonathan Fluharty-Jaidee, Martin Schmalz, Manyun Tang, Joshua White, and William Zame

Note: Papers during my time at the PCAOB

- Cited in PCAOB release No. 2024-012 on firm and engagement metrics, PCAOB Chair Address at 2024 AICPA & CIMA Conference

[3] Knightian Uncertainty and Fair Value Estimation

Status: Preparing for initial submission

with Rick Mergenthaler

Note: Based on Second-year Paper at Penn State

[4] PCAOB Inspection Reports and Information Dissemination

Status: Preparing for initial submission at the *Review of Financial Studies*

with Andrew Acito, Amir Amel-Zadeh, James Anderson, William Anderson, Daniel Aobdia, Francois Brochet, Huaizhi Chen, Jonathan Fluharty-Jaidee, Martin Schmalz, and Manyun Tang

Note: Based on Second-semester Proposal at Penn State; Papers during my time at the PCAOB

[5] Climate Risk and Corporate Green Innovation: Evidence from Nearby Climate Disasters

Status: Preparing for initial submission

with Phong Truong

WORKS IN PROGRESS

[6] Inflation and Accrual Anomaly: From a View of Conditional Asset Pricing

with Nastaran Mirzayi

[7] Bypassing the Bureaucracy: The Presidential Information Transmission and Regulatory Outcomes

[8] Presidential Interaction and Judicial Independence: Evidence from Corporate Litigation

[9] Accounting Standards and University Bonds

with Daniel Aobdia and Yuchen Li

TEACHING EXPERIENCE

Penn State University, Smeal College of Business

- Instructor: ACCTG 404 Managerial Accounting (Undergraduate, 2023)
Average evaluation: 6.5/7.0
- Teaching Assistant: ACCTG 502 Accounting Research and Analysis (DBA, 2025)
- Teaching Assistant: ACCTG 211 Financial Accounting (Undergraduate, 2023)

PROFESSIONAL SERVICE

Conference Reviewer

2027 Hawaii Accounting Research Conference, 2026 FARS Midyear Meeting, 2026 AAA Annual Meeting, 2022 FARS Midyear Meeting, and 2022 AAA International Accounting Midyear Meeting.

CONFERENCE PRESENTATIONS AND PARTICIPATION

(P) denotes Presenter; (D) denotes Discussant

WashU Olin Accounting Research Conference 2026 (P, Poster; scheduled)

Midwest Accounting Research Conference 2025, 2026
